-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 5-6 and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 05/31/2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Honda et al. (US 6,476,417).

Honda et al. discloses an optical module (Figs. 1a, 7) comprising: an interconnect board (14) which includes a base board (14A) and an interconnecting pattern (14B) formed on the base board; an optical chip (12) which includes an optical section (12c) and an electrode (12b) which electrically connects the optical section and the interconnecting pattern; and a body material (16A) which holds a lens (18) which concentrates light on the optical section, wherein the body material (16A) is directly attached to the optical chip (12), wherein an opening (14a) is formed in the base board, wherein the optical chip is bonded face down to the interconnect board so that the

Art Unit: 2811

optical section faces the opening, and wherein the body material is attached to the optical chip through the opening.

Regarding claims 10 and 11, the body material (16A) is bonded to the optical chip (12) through an adhesive (66).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Honda et al. (US 6,476,417).

Honda et al. as described above further discloses an adhesive (26) provided between the body material (16A) and the interconnect board (14) but does not explicitly disclose the adhesive (26) being a resin. However, it is notoriously known in the art to use resin as a bonding material for an adhesive layer. Therefore, forming the adhesive (26) of resin would have been obvious to bond the body material to the interconnect board.
